New Enhanced Reading (ER) Features

- Using patent-pending reading technology, ER allows for automated confirmation of MICR data.
- When ER is enabled, MICRImage compares the results of multiple MICR reads, deeming the data accurate when all reads match, or reporting an error to the application when there is a mismatch.
- ER provides the highest level of confidence in read reliability for electronic check transactions.
- ER is a standard feature that can be enabled or disabled as required by the application.

Features

- Reads MICR data and scans check image in a single pass.
- Reads E13B and CMC7 fonts
- Scans check images in black & white or grayscale using the TIFF file format
- Image storage capacity for up to 100 black & white images; other models with higher capacity available.
- Each model includes two interface ports: RS232 & RS232 / RS232 & Ethernet / RS232 & integrated Modem.
- Easy-access feature allows cover to slide open for convenient cleaning of scan bar and check path. No tools required.
- Attractive ergonomic design with visual cues for ease-of-use and faster training.
- Optional 3-Track MSR (Magnetic Stripe Reader) for ISO and AAMVA card standards.
- MICRImage is ideal for all electronic check applications such as NACHA's POP, ARC, and RCK.

General Info

Color	Dimensions	Weight
Dark gray & purple	Height: 6 in (152,4 mm) Width: 3.9 in (99,06 mm) Length: 9 in (228,6 mm)	2.5 lbs (1,134 kg)

Interface

RS-232	RS-485	Ethernet
--------	--------	----------

Internal Modem		
----------------	--	--

▼ **Specifications**

Power Adaptor	12V DC regulated 1.5A
----------------------	-----------------------

Standard Configurations

Without MSR (MICR only)

Description	Part Number
RS-232/RS-232	22410002
RS-232/Internal Modem	22410006
RS-232/Ethernet	22410004

With MSR

Description	Part Number
RS-232/RS-232	22410003
RS-232/Internal Modem	22410007
RS-232/Ethernet	22410005
